

AI Data Pipeline & Storage Design

Day 7 Internship Deliverables

Submitted By

Name: Shinas PN

Internship: AI Developer Intern

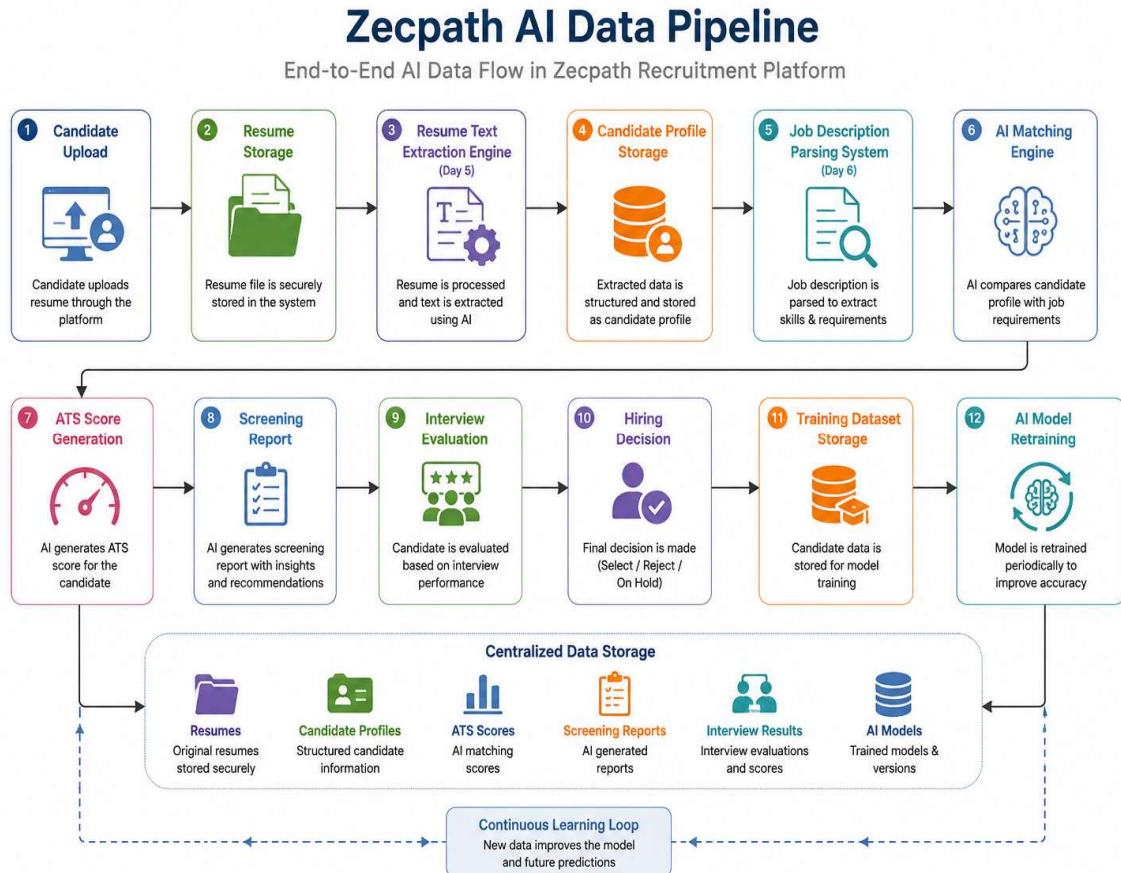

Date: 30 July 2026

Submitted To

Company: Zecpath

Department: Product & Engineering Team

1.AI data pipeline diagram

2.Storage structure documentation

```
day7 > documentation > storage_structure.md > abc # 1. Resume Storage > abc ## Storage Location
1  # Zecpath AI Storage Structure Documentation
2
3  ## Overview
4
5  Zecpath AI requires a structured storage system to manage candidate data throughout the AI hiring lifecycle.
6
7  The storage system manages:
8
9  - Resume documents
10 - Extracted candidate profiles
11 - ATS scores
12 - Screening reports
13 - Interview results
14
15
16 # 1. Resume Storage
17
18 ## Purpose
19
20 Stores original candidate uploaded documents.
21
22 ## Storage Location
23
```

3.Metadata standards document

```
day7 > documentation > metadata_standards.md > abc # Required Metadata Fields > abc ## 1. Candidate ID > abc ### Example
1  # Zecpath AI Metadata Standards Document
2
3
4  ## Overview
5
6  Metadata helps Zecpath AI track, organize, and manage all AI-generated and stored data.
7
8  Every AI data record should contain standard information about:
9
10 - Candidate
11 - Job
12 - AI model
13 - Processing time
14 - Data status
15
16
17 # Required Metadata Fields
18
19
20 ## 1. Candidate ID
21
22 ### Purpose
23
```
