

Job Description Parsing System

Day 6 Internship Deliverables

Submitted By

Name: Shinas PN

Internship: AI Developer Intern

Date: 29 July 2026

Submitted To

Company: Zecpath

Department: Product & Engineering Team

1.Job description parser module

```
day6 > parser.py > ...
1  import re
2  import json
3
4  # Read Job Description
5  file_name = input("Enter Job Description file name: ")
6
7  try:
8      with open(file_name, "r", encoding="utf-8") as file:
9          jd_text = file.read()
10
11  except FileNotFoundError:
12      print("Error: File not found.")
13      exit()
14
15  # Extract Role Name
16  role = jd_text.split("\n")[0].strip()
17
```

```
PS C:\Users\91949\OneDrive\Downloads\Desktop\my works\Zecpath-AI-Onboarding\day6> python parser.py
Enter Job Description file name: sample_jd.txt
