

ANIRUDH K N

+91 89213 60955 | theanirudhkn@gmail.com | linkedin.com/in/anirudh-k-n | Bengaluru, India

Professional Summary

Results-driven Computer Applications graduate with hands-on experience in data pipeline development, REST API integration, workflow automation, and interactive dashboard design. Proficient in Python, SQL, and Power BI; experienced building ML-based systems with real-time data ingestion and anomaly detection. Eager to apply software engineering, system integration, and generative AI skills in application engineering and cloud AI roles.

Technical Skills

- **Languages & Frameworks:** Python (pandas, NumPy, scikit-learn), SQL, DAX, Power Query
- **AI/ML & Analytics:** Predictive Modeling, Anomaly Detection, EDA, Statistical Analysis, Generative AI (LLM concepts)
- **BI & Visualization:** Power BI, Tableau, Streamlit, Advanced Excel (PivotTables, VLOOKUP)
- **Systems & Integration:** REST API Integration, Real-Time Data Pipelines, Workflow Automation, Modular Architecture
- **Databases & Data Management:** SQL (joins, filters, aggregations), Data Ingestion, Data Transformation, Data Cleaning
- **Tools & DevOps:** Git/GitHub (version control), MS Excel, PowerPoint, Outlook

Experience

Data Science and Analytics Intern

Apr 2026 – May 2026

Future Interns (Remote)

- Built automated reporting workflows using Python and Power BI to monitor KPI trends across business datasets; reduced manual reporting effort by ~30% and improved turnaround speed.
- Performed sales analysis, customer churn reporting, and marketing funnel analysis; identified behavioral anomalies to surface actionable insights for cross-functional stakeholders.
- Developed scalable reporting pipelines integrating multi-source datasets; communicated findings in structured performance reports aligned with business intelligence standards.

Risk Dashboard Developer Intern

Feb 2026 – Apr 2026

Zetheta Algorithms Pvt Ltd (Virtual)

- Designed and maintained real-time financial risk dashboards with live monitoring of KPI metrics; produced periodic trend summaries for senior stakeholders to support data-driven decisions.
- Applied statistical analysis to large financial datasets; translated findings into structured performance reports aligned with business intelligence and system integration requirements.

Data Analyst Intern

Jan 2026 – Feb 2026

Quest Innovative Solutions Pvt Ltd (Kochi)

- Built and maintained interactive Power BI dashboards to track business KPIs; developed DAX measures and automated data transformation workflows using Power Query.
- Cleaned and restructured large datasets from multiple sources to support business planning; delivered analytical reports on schedule to management stakeholders.

Projects

AI-Based Earthquake Risk Analysis & Seismic Pattern Prediction System

Apr – May 2026

Python, Power BI, Streamlit, USGS REST API, Scikit-learn, Git/GitHub | GitHub

- Built an end-to-end ML risk classification pipeline (Random Forest, Decision Tree, Logistic Regression) with live USGS REST API integration for real-time data ingestion, anomaly detection, and severity alerting.
- Designed a modular backend processing architecture covering data ingestion, transformation, feature engineering, and integrity validation across geospatial datasets.
- Developed interactive Power BI dashboards and a Streamlit reporting UI for live monitoring of seismic patterns; delivered visual insights accessible to non-technical audiences.

Virtual Experience Programs — Forage

- **AWS — Solutions Architecture** (Jan 2026): Designed a scalable, cloud-hosted architecture; applied infrastructure design principles to system integration and deployment planning.
- **JPMorgan Chase & Co. — Quantitative Research** (Feb 2026): Analyzed commodity price data; built financial pricing models and performed structured risk analysis workflows.
- **Tata Group — Gen AI Data Analytics Simulation** (Jan 2026): Conducted EDA to identify data quality issues; built predictive models for customer delinquency risk assessment using generative AI concepts.

Education

Bachelor of Computer Applications

Expected June 2026

East Point Group of Institutions, Bengaluru North University

CGPA: 8.2 / 10.0

Certifications

Google Analytics Certified — Google (Feb 2026) | Introduction to Generative AI — Google Cloud (Jan 2026) | AI Infrastructure & Operations Fundamentals — NVIDIA (Feb 2026)
