

Zecpath AI Internship

Day 24 — Speech-to-Text & Transcript Processing

Deliverables Completed

#	Deliverable	Status
1	Speech-to-Text (STT) Integration	Completed
2	STT Accuracy Testing	Completed
3	STT Accuracy Test Report	Completed
4	Transcript Cleaning	Completed
5	Transcript Normalization	Completed

1. Speech-to-Text Integration

Implemented and verified the Speech-to-Text module using Whisper. The module successfully converted interview audio into text.

2. STT Accuracy Test

Test audio: stt_test_accent1.wav

Detected language: English (en)

Transcript: I have two years of experience in Python and Fast API.

3. STT Accuracy Test Report

The STT accuracy test completed successfully. The test status was recorded as PASSED in data/stt_accuracy_report.txt.

4. Transcript Cleaning

Implemented transcript cleaning to remove filler words, normalize spacing, and clean punctuation for readable interview responses.

5. Transcript Normalization

Implemented transcript normalization in interview_ai/transcript_normalizer.py.

Normalization Test

Raw: uhh... I have two years um of experience in Python .

Normalized: I have two years of experience in Python.

Final Status

Day 24 implementation completed successfully.
